

Financial System - FAQ Knowledge Base

Q: Is my financial data secure when interacting with the AI?

A: Yes. We use industry-standard encryption for data at rest and in transit. Our architecture is designed to comply with local financial data regulations, ensuring your sensitive information remains private.

Q: Can the AI initiate a transfer of funds on my behalf?

A: No. For your security, the AI cannot independently initiate or authorize financial transactions. It can only provide guidance via official secure channels.

Q: How does the system handle hallucinations or incorrect financial info?

A: We use a Retrieval-Augmented Generation (RAG) system restricted to authorized documentation. If unsure, it escalates to a human agent.

Q: What regulatory standards does this platform follow?

A: We align with relevant CBN directives on digital financial services, data sovereignty, and operational resilience.

Q: How do I report a suspicious transaction?

A: Contact the 24/7 Fraud Prevention line immediately and provide the transaction ID for urgent review.

Q: Can the AI provide personalized investment advice?

A: No. It only provides general educational information.

Q: Where is my transaction data stored?

A: On secure, resilient infrastructure meeting local regulatory requirements.

Q: What is the Intent Verification process?

A: Sensitive requests require identity verification before account details are disclosed.

Q: How are customer complaints logged and audited?

A: Interactions are timestamped and stored in an audit-ready format.

Q: Does the system have a HITL mechanism?

A: Yes. Out-of-scope queries or frustrated users are escalated to a human specialist.

Q: How long are logs kept?

A: They are retained according to national financial audit requirements.

Q: Can I check my account balance?

A: Yes, after completing MFA.

Q: How do I update my KYC?

A: The AI guides you through required documents; compliance processes them.

Q: What if the AI provides an outdated policy?

A: Use the Report Issue feature to trigger review.

Q: How are account lockouts handled?

A: The AI initiates recovery; human verification unlocks the account.

Q: Is the system available 24/7?

A: Yes. AI support is always available; human support follows business hours.

Q: Can the AI explain fees and charges?

A: Yes. It can explain the latest fee schedule.

Q: How is my privacy protected?

A: PII is automatically masked before processing.

Q: Can the AI help dispute a charge?

A: Yes. It creates a dispute ticket for human review.

Q: What are the operational boundaries?

A: The AI only provides verified policy information and cannot make legal or financial promises.
